

Mohit Prajapati

Senior Full-Stack Software Engineer | TypeScript | React | Node.js | MongoDB

☎ +91 8931068419 ✉ prajapati.mohit717@gmail.com 🔗 linkedin.com/in/mohit-prajapati 📍 Lucknow, India

Summary

Senior Full-Stack Software Engineer with 9+ years of experience building and scaling production SaaS and enterprise applications using TypeScript, JavaScript, React, Next.js, Node.js, Express.js, and MongoDB. Strong experience designing REST APIs, authentication systems, database schemas, and scalable backend services, with hands-on ownership from requirements and architecture through development, testing, deployment, and production support. Experienced in leading engineering teams, collaborating with international clients, and delivering reliable products in Agile environments.

Technical Skills

Languages:	TypeScript, JavaScript (ES6+), HTML5, CSS3
Frontend:	React.js, Next.js, Redux, Tailwind CSS
Backend:	Node.js, Express.js, RESTful APIs, JWT Authentication, Socket.io
Database:	MongoDB, PostgreSQL, MySQL, Database Optimization, Schema Design
Architecture & Engineering:	MERN Stack, Software Architecture, Microservices Architecture, SOLID Principles, Clean Architecture, Object-Oriented Design, Code Reviews, Automated Testing
DevOps & Cloud:	Docker, AWS (EC2, S3, IAM), Linux, Nginx, PM2, CI/CD, Git
Leadership:	Technical Leadership, Mentorship, Agile/Scrum, Roadmap Planning, Cross-Functional Collaboration

Professional Experience

Jamtech Technologies Pvt. Ltd. Jun 2020 – Present | Lucknow, India
Tech Lead / Team Lead Coordinator Jul 2025 – Present

- Led a 5-member MERN engineering team, owning technical direction, architecture decisions, sprint planning, code reviews, and delivery while improving sprint throughput by 30% through structured Agile/Scrum practices.
- Led the transition from a monolithic architecture to microservices, improving scalability and enabling the platform to support thousands of concurrent users with high availability.
- Established engineering standards for system design, code reviews, and maintainable development practices while mentoring developers and improving onboarding.

Senior Software Engineer Oct 2021 – Jul 2025

- Reduced API response latency by 35% by redesigning RESTful services, optimizing database queries, and improving JWT-based authentication flows.
- Reduced deployment cycle time by 50% by implementing CI/CD pipelines, automated testing, and zero-downtime deployments using Linux, Nginx, and PM2.
- Contributed to technical roadmap planning and mentored two junior engineers transitioning to the MERN stack.

Software Engineer Jun 2020 – Oct 2021

- Built and maintained production web applications using React.js, Node.js, CodeIgniter, Laravel, and WordPress, adapting solutions to diverse client requirements.
- Contributed to the transition toward the MERN stack by developing JWT-authenticated REST APIs and integrating React.js, Node.js, and database services.

SmarterChains Lucknow, India
Jr. Software Engineer Aug 2018 – Jun 2020

- Developed and maintained core capabilities for an Industry 4.0 factory-operations platform using CodeIgniter, collaborating with a distributed Geneva-based team.
- Collaborated across time zones using Git workflows and Agile practices to deliver production features in a distributed engineering team.

360Adaptive Technologies Lucknow, India
Jr. Software Engineer Jan 2017 – Jul 2018

- Built production web applications using PHP, CraftCMS, WordPress, and CodeIgniter, delivering responsive solutions for client requirements.
- Established reusable frontend components and coding standards to improve consistency and maintainability across projects.

Education

Master's Degree in Computer Applications Feb 2015 – Aug 2018
Sikkim Manipal University – Distance Education (Lucknow)

Bachelor's Degree in Computer Applications Aug 2010 – Jun 2013
Sam Higginbottom University of Agriculture, Technology and Sciences (Prayagraj)

Key Projects

Enterprise CRM System

MERN Stack, TypeScript, Tailwind CSS, Shadcn UI, D3

- Architected a full-stack multi-tenant CRM handling 100k+ records, designing normalized and composite-indexed database schemas with RBAC-based access control.
- Containerized application services with Docker and automated environment provisioning and database synchronization to improve deployment consistency across environments.

MoneyLens – AI Powered Personal Finance & Budget Management Platform (In Progress)

Next.js, TypeScript, Tailwind CSS, Shadcn UI, Recharts, Prisma ORM, MongoDB

- Building a full-stack personal finance platform with Next.js and TypeScript for managing income, expenses, budgets, and savings through interactive financial dashboards and analytics.

Skymail – Developer Email Testing Platform (Personal Project)

Next.js, TypeScript, Tailwind CSS, Shadcn UI, MongoDB

<https://github.com/Mohit717/skymail>

- Built a developer-focused email testing platform with project-based SMTP credentials, test inboxes, email search, and attachment support; designed the core account provisioning and inbox workflows using Next.js, TypeScript, and MongoDB.
